Education

Institute of Automation, Chinese Academy of Sciences   2020.09–present
Ph.D. Computer Application Technology, School of Artificial Intelligence

Beijing Institute of Technology   2016.09–2020.06
B.S. Computer Science and Technology, School of Computer Science
Selected Coursework: Natural Language Processing, Computer Vision Processing, Machine Learning

Research Interests

My research focuses on advancing multimodal foundation models (e.g., CLIP, LLaVA) to enhance their scalability, adaptability, and efficiency in open-world scenarios. Specifically, I am exploring:

- **Continual MLLM learning algorithms**: Enable multimodal models to evolve incrementally, integrating new knowledge without forgetting.

- **Flexible MLLM architectures**: Build models that adaptively adjust parameters and resolution based on real-world tasks.

Honors and Awards

Merit Student, 20%, University of Chinese Academy of Sciences   2022
Excellent Academic Scholarship, 15%, Beijing Institute of Technology   2019
Excellent Academic Scholarship, 15%, Beijing Institute of Technology   2018

Publications

Academic Service and Teaching Assistant

Journal Reviewer: IEEE Transactions on Image Processing (TIP), IEEE Transactions on Neural Networks and Learning Systems (TNNLS), Elsevier Neural Networks.

Teaching Assistant: Machine Learning, Graduate Students Course at University of Chinese Academy of Sciences, 2022-2023.
